Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16, drawn to a process of making a threaded fastener.

Group II, claim(s) 17-26, drawn to a threaded fastener.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The threaded fastener claimed in Group II could be made by a process that is distinct from the process claimed in Group I. For example, the threaded fastener could be formed by first forming a blank of fiber reinforced plastic in a cylindrical shape with exterior fibers that extend generally parallel to the axis of the blank and then warming the blank to soften the plastic and roll forming threads on the blank. A "product by process" claim, such as those of Group II are directed to the product per se, no matter how actually made.

Art Unit:

3. These inventions are distinct for the reasons given above and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Neill Wilson whose telephone number is (703) 308-2168.
